Benefits of UltimateHD with Polycom HDX 9000 Solutions

HD Voice

Hear every detail you want and none that you don't

- Voices, sound and music in the highest quality audio in 22kHz stereo with Siren™22
- StereoSurround™ separates multiple voices for conversational stereo
- HDX digital Microphone Array delivers flawless sound with extended 360- degree room coverage and immunity to cell phone interference
- Fully backward compatible with any legacy or VSX system

HD Video

Make informed, real-time decisions with confidence

- See every visual detail flawlessly from anywhere in the room; every participant experiences the best conference
- Read body language clearly; don't miss a single expression
- Bring the whole team together for critical decisions with 8-way internal multipoint capability and 6Mbps bandwidth support

HD Content

Meet naturally; see both presenter and their presentation simultaneously

- H.239 standard based; H.264 compression for highest quality
- See HD video and native resolution content on a single display with dual monitor emulation

Share every detail of your work; demonstrate your value!

- Share every input in native quality with up to (5) HD video inputs
- Connect HD doc cams, DVD players and more
- Share any media in high definition with full motion
