

# Polycom® Judicial Collaboration System

*Unique solution for judicial, legal  
and penal applications*

## BENEFITS

- **Cost effective** – eliminates the costs and travel time involved in transporting detainees and inmates to off-site locations
- **Efficient** – improves the use of courts and officers' time
- **Secure** – eliminates the security risks associated with removing inmates from prisons to go to court
- **Accessible** – allows more involvement and wider representation of participants in hearings, arraignments and other judicial proceedings
- **Effective** – increases communication between inmates and correctional, legal, psychiatric and judiciary representatives
- **Time-saving** – accelerates the judicial process by eliminating the logistical barriers of time and distance

The iPower™ Judicial Collaboration System is an easily-controlled, secure, cost-effective solution that meets the unique challenges of administering justice today.

**Designed for many judicial environments.** Supports one-to-one or one-to-many types of communication in courtrooms, offices, conference rooms, prisons, visitation centers and other meeting areas. Designed for a variety of security environments, the system can be implemented as either a permanent, floor-bolted communication station or a mobile unit with casters that lock firmly into place. The system is protected against damage by a secure cabinet with steel construction, an unbreakable Lexan® shield and lockable panels.

### **Increased communication at lower costs.**

With everything from enhanced audio to a removable work surface, the system offers a very efficient way to enable greater communication while decreasing travel time, security risks and transportation costs. The Judicial Collaboration System eliminates the need for hundreds of daily trips between court locations and corrections facilities. In prisons, the system can be made available to prisoners and their attorneys so they can confer and appear before the court via video or allow parole boards to include victims in the hearings. The system can also help reduce congestion in holding cells and in the courthouse.

### **Extensive range of applications.**

Judicial, legal, and penal applications are just some of the uses for the Judicial Collaboration System. The

system can also be effectively used for:

- Video Arraignments
- Video-enabled courtroom presentations, such as expert witnesses and remote testimony
- Psychiatric evaluations and consultations
- Rehabilitative distance learning programs
- Warrants
- Communication between inmates and legal counsel or government representatives
- Judicial consideration of appeals
- Visitations

- Parole board hearings
- Inmate and officer testimony

**Easy to use and maintain.** Unique system design minimizes operational concerns. An enhanced audio system includes amplifier, microphone and a safe armored handset for private communications. A compact control unit, located on site or remotely, can be implemented in a wireless mode. This easy-to-clean, durable system also includes removable, lockable side panels for ease-of-access.

## Judicial Collaboration System Specifications

### Physical Dimensions

#### External

- 30" (77cm)w x 62.5" (159cm)h x 30" (77cm)d

#### Internal

- 24" (61cm)w x 56.5" (144cm)h x 24" (61cm)d

#### Removable work surface

- 30" (77cm)w x 18" (46cm)d

#### Weight

- 325 lbs. (150kg)

### Construction

- 12 gauge steel cabinet with 3/8" unbreakable transparent Lexan window and fully lockable cart
- Audio speaker and microphone mounted inside the cabinet
- Removable work surface in front

### Options

- Audio handset

### Operational Features

- Videoconferencing operated with standard or custom iPower codec infrared keypad options

- Unit may remain mobile or be permanently installed
- Optional audio handset feature for privacy

### CODECs Supported

- Polycom iPower™ family or Polycom ViewStation® CODEC may be housed inside
